Stock Millwork Catalogue

NUMBER 34

*Doors, Windows,
Sash, Frames,
Millwork and
Art Glass*

Published by
DEMPSEY, KIMSEY & DOWNS
422 S. W. Main Street, Portland, Oregon
COPYRIGHT 1934, BY DEMPSEY, KIMSEY & DOWNS

INTRODUCTION

» «

MUCH care has been expended to make this catalog serve the widest range of usefulness to the dealer, architect, contractor and builder. The many drawings of standard sash and doors with which the pages are embellished have a distinct sales value in helping to better visualize their uses.

We urge all those using this book to continue to specify numbers and designs so that the excellent co-operation already obtained may be continued with even better results and more satisfaction to all interested in improving building construction details and Architecture.

While it has been our aim to compile this catalog in such a manner as to make everything clear, at the same time, your problems or any questions regarding the items will be cheerfully answered if taken up with our correspondence department.

All prices shown in this catalog are list and subject to a discount.

DIRECTIONS FOR ORDERING

Always order by Design Number. Time, Misunderstanding and Expense Can Be Saved by Noting and Following Closely the Suggestions Below:

We will understand all orders and inquiries as calling for the Style and Sizes as described in Stock Millwork Catalog No. 34, unless specifically ordered otherwise or unless covered by instructions to the contrary.

Be Explicit in ordering. Do not assume that we know what you want.

Always give **width** first, length or height second, then thickness.

The term "Sash" indicates only one piece to fill opening.

The term "Window" indicates two pieces (upper and lower Sash).

Orders for Windows should state the number of lights in the windows, glass size of same, thickness of sash, and whether check or plain rail.

When an odd sash or window is ordered, always give both glass size and number of lights and outside measure, and, if possible, send sketch.

Note.—All windows and sash are understood to be glazed unless specifically ordered open. If D. S. glass is wanted, same should be specified.

DOORS

State width, height and thickness, number of panels and arrangement of same.

The sticking of the various doors shown in this catalog is standard in the Northwest, and we will understand all orders to be for same, unless otherwise specified.

If odd, send sketch or detail.

Odd doors will be made with regular stock widths of stiles, rails, muntins and panels unless specifically ordered otherwise.

SASH WEIGHTS

We carry a stock of sash weights, pulleys and sash cord. Customers ordering same from us will be assured of receiving weights to properly balance sash, as where we furnish weights we weigh each sash separately and supply weights of the correct size for same.

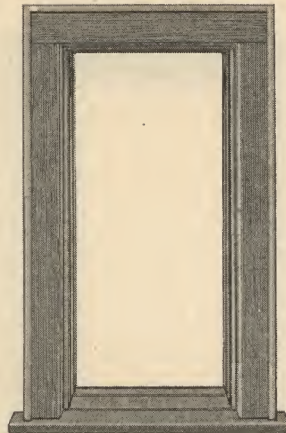

WINDOW FRAMES

SEMI-ASSEMBLED—FOR 1 $\frac{3}{8}$ " DOUBLE RUN WINDOWS—JAMBS, 5 $\frac{1}{4}$ " Width

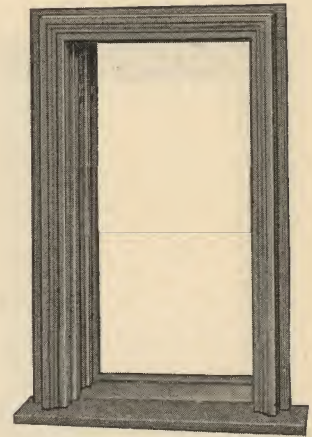

No. 500

Plain Cased Standard
Window Frame.

No. 501

Plain Cased Standard
Window Frame with
Backband Trim.

No. 502

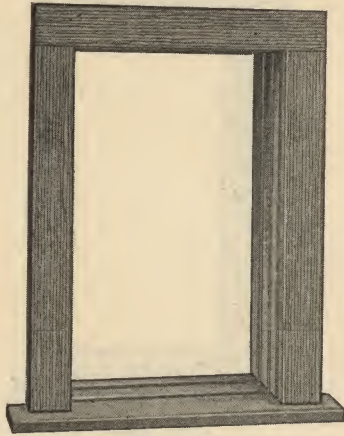

Shake Mould Frame.
For use with Shingles, Shakes,
Siding or Brick Veneer Construction.

TWO LIGHT CHECK RAIL WINDOWS

1 $\frac{3}{8}$ " Thick

Plowed and Bored
for
Weights and Cord

No. 521—Glazed S.S.B.

No. 522—Glazed D.S.B.

Measurements for Rough Stud Opening determined:

For width, by adding ten inches to width of glass.

For height, by adding ten inches to combined height of glass in top and bottom sash.

Note how
window
is made.

This is
what is
termed

CHECK

RAIL

It helps
to keep
out cold
and dust.

**METAL TOP LIGHT WINDOWS**

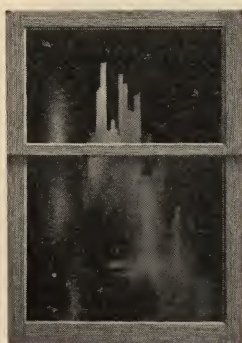

The tops of these windows are glazed with small pieces of glass skillfully worked into attractive patterns by use of metal bars. The bars are securely soldered together making them water-proof. Some favor this type of glazing in place of wood bars.

We can execute any special cut-up design or pattern in these Metal Light Windows.

Glazed D. S. in Metal

No. 659—Fir.

No. 660—Philippine Mahogany.

CARE OF FRONT DOORS—IMPORTANT INFORMATION

Do not allow Hardwood Doors to be delivered to your building until you are ready to use them and until the building is thoroughly dry. Immediately upon receipt of the doors they should be properly finished and the top and bottom edges given a coat of oil and white lead. This last is important as the door is sure to absorb moisture if this precaution is not taken.

OVERHEAD GARAGE DOORS

GLAZED

No. 690

Overhead Doors are made in sections and can be furnished with all hardware mounted in place. Installation is greatly simplified by this method. The demand for the overhead type of door is a permanent one and owners are enthusiastic over the ease with which these sets operate. Doors will stay open at any desired point while a slight lift will allow doors to glide up safely, leaving full clearance of the door opening.

Heavy springs, counter-balance the weight of the doors. Heavy bolted strap hinges—steel cables, operating over large smooth working pulleys—ball-bearing wheels and heavy steel reinforcing strips for doors are but a few of the many features that place these sets in a distinctive class.

AS CERTAIN MINOR DETAILS OF OPENING CONSTRUCTION ARE NECESSARY, IT IS IMPORTANT THAT BUILDERS HAVE THIS INFORMATION TO PROPERLY PREPARE OPENING FOR INSTALLATION. THESE INSTRUCTIONS WILL BE SENT UPON REQUEST.

Sizes Wide High	Thick- ness	No. of Sections	Panels to a Section	Complete Door Ship. Weight
7-6 x 7-0	1 3/8"	3	4	286
7-6 x 7-6	1 3/8"	3	4	284
8-0 x 7-0	1 3/8"	3	4	289
8-0 x 7-6	1 3/8"	3	4	301
8-0 x 8-0	1 3/8"	4	4	315
8-0 x 10-0	1 3/4"	5	4	462

HARDWOOD FLOORING

We Carry A Complete Stock of All Standard Grades and Sizes of Oak and Maple Flooring

TO COMPUTE the amount of flooring to be ordered for a given room, add to the square foot area of the room as follows:

- $1\frac{1}{8} \times 2\frac{1}{4}$ T. & G.—add $33\frac{1}{3}\%$.
- $1\frac{1}{8} \times 1\frac{1}{2}$ T. & G.—add 50 %.
- $\frac{3}{8} \times 1\frac{1}{2}$ T. & G.—add $33\frac{1}{3}\%$.
- $\frac{3}{8} \times 2$ T. & G.—add 25 %.
- $\frac{1}{8} \times 2$ —Sq. Edge—no addition.

Due to irregularities caused by closets, bay windows, fireplaces, etc., an additional provision of 5% should be made to cover cutting and fitting.

GRADING RULES

Plain Sawed

1st Grade

or

CLEAR—The face shall be all heartwood and practically free of defects.

Bundles to be 2 feet and up, not to exceed 20% under 4 feet.

Average length 5 feet.

2nd Grade

or

SELECT—The face may contain sap, and will admit pin worm holes, streaks, slight imperfections in dressing or a tight pin knot not to exceed one to every 4 feet in length.

Bundles to be 2 feet and up. Average length $4\frac{1}{4}$ feet.

3rd Grade

or

No. 1 COMMON—Shall be of such nature as will make and lay a sound floor without cutting.

Bundles to be 2 feet and up. Average length $3\frac{1}{4}$ feet.

How Oak Flooring Should Be Handled—In Use

To assure delivery of Oak Flooring for installation in the same perfect condition in which it comes from the manufacturer, the following safeguards are recommended:

Never expose oak flooring to adverse weather. When unloading, protect the flooring from moisture and dirt while in transit from car to storage, by covering the bundles with tarpaulins or convey the stock in covered trucks.

Place the flooring immediately in a closed, clean, dry, well-ventilated room or bin—but **never in an open shed.**

Many dealers store Oak Flooring in specially constructed, heated warehouses. This assures effective protection against dampness and keeps the flooring in perfect condition as long as it is in storage.

Oak flooring should not be delivered to the building until all masonry and plaster work, the floor fill, wall papering and the painting are dry, and until all other work preliminary to the floor laying has been completed.

The delivered oak flooring should be taken into the building immediately. In wet or cold weather, it is advisable to subject both the building and the housed flooring to artificial heat for a few days before laying.

Lay Oak Flooring over properly constructed sub-floors, and finish according to specification methods. (**Sent on request.**)

Send for our Special Booklet "HOW TO LAY AND FINISH OAK FLOORS."

For prices refer to our Current Price List.

VENEER PANELS AND PLYWOOD WALLBOARD

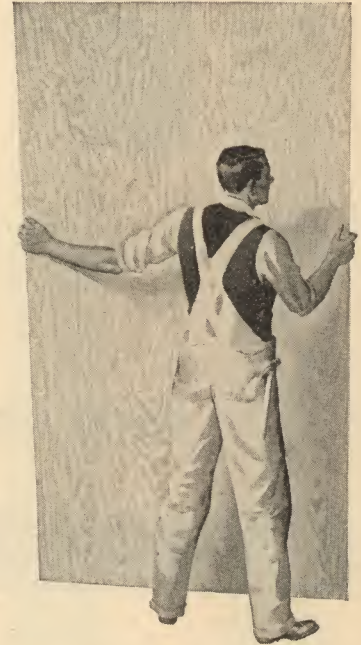

PLYWOOD WALLBOARD — Made of three layers of veneer laid at right angles to each other and welded together with a water resistant cement.—Full Quarter Inch Thick.

Plywood Wallboard is the ideal material for finishing ceilings and walls of Homes, Summer Cottages, Attics and Basements. It is also widely used for lining Garages and Farm Buildings of all kinds, especially Poultry Houses and Milk Houses. Beautiful effects can be obtained by using it to panel the walls of Stores, Restaurants, Offices and other Public Buildings.

Plywood Wallboard is the strongest known building material for its weight, and due to the fact that it is easily sawn and holds nails and screws close to the edge, has a wide variety of uses. Write for a sample of this wonderful material.

USE PLYWOOD WALLBOARD for

PANEL GRADES

FOR CABINETS AND FIXTURE WORK

$\frac{1}{8}$ " — $\frac{1}{4}$ " — $\frac{5}{16}$ " — $\frac{3}{8}$ " — 3 Ply.
 $\frac{1}{2}$ " — $\frac{5}{8}$ " — $\frac{3}{4}$ " — 5 Ply.

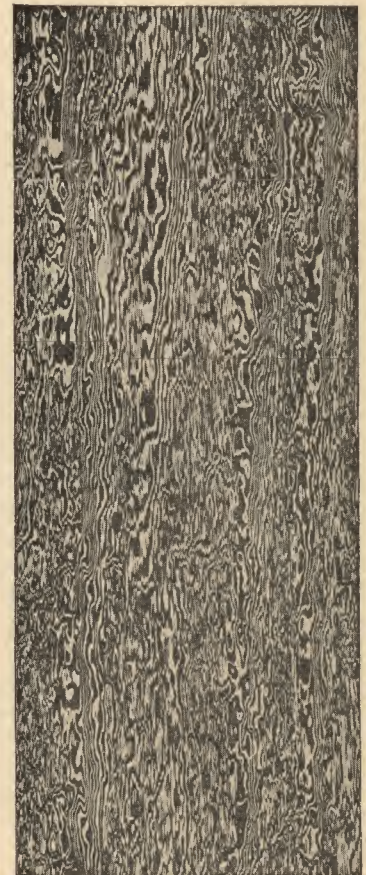

We furnish this Plywood in three grades, namely:

GOOD TWO-SIDES. This grade has two perfect faces and is suitable for the finest work where both sides of the panels are to be exposed.

GOOD ONE-SIDE. These panels have one perfect face and are intended for all uses where one side only is exposed, such as wall paneling, etc. They have a reject back which may contain large knots, splits and other defects.

SOUND TWO-SIDES. These panels have a sound surface on both sides, but may show some discoloration and limited sound defects. Not suitable for stained finishes. This grade is intended for use where the surfaces are to be enameled or painted, and for working up into small cuttings. This grade is particularly adaptable for shop use.

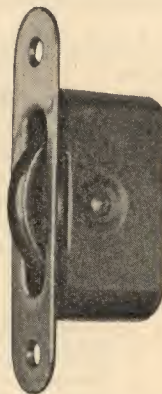

For prices refer to our current VENEER AND PANEL LIST.

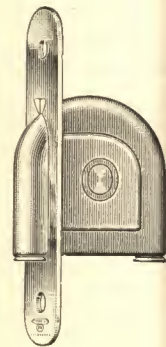

SASH PULLEYS

No. 110.—Fits mortise made by Quadruple Bit No. 12 or by boring four $\frac{1}{16}$ " holes, centers $\frac{5}{8}$ " apart, saw-tooth fastening device.

No. 21.— $2\frac{1}{4}$ " wheel, $1\frac{1}{8} \times 5$ " face plate. Boston Bronze lacquer finish.

Jamb-Proof Pulley

ART GLASS

In presenting the following pages of art glass, we have endeavored to select the most practical designs and styles now in demand.

Directions for Ordering

When selecting a design, compare the size and shape of glass wanted with the size and shape of design. Have them as nearly alike as possible. When special shaped openings are required, send full size paper patterns.

A universal rule among all glass manufacturers is: always specify width first, then height. It is assumed that the glass rabbet is $\frac{3}{8}$ " unless otherwise specified.

All straight line designs are made up with zinc bars or cames. If lead cames are desired, please indicate. Curved designs, unless otherwise specified, will be made up either in lead or zinc, at our discretion.

A universal rule among all glass manufacturers is: always specify width first, then height. It is assumed that the rabbet is $\frac{3}{8}$ " unless otherwise specified.

All straight line designs are made up in metal. If lead cames are desired, please indicate. Curved designs, unless otherwise specified, will be made up either in lead or metal, at our discretion.

Where colors are incorporated in the design, specify whether bright or delicate coloring is desired.

When window lights are ordered to fill a smaller space or of a different shape than indicated in design, we reserve the right to modify the design or increase the price.

All sizes under 3 sq. ft. will be charged at the rate of 3 sq. ft. Lights measuring less than 12 inches in height or width will be charged on the basis of 12 inch height or width.

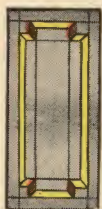

Special discounts are allowed on quantities of same size and kind.

Care in following out the above general instructions in ordering will enable us to execute your orders promptly.
